Assignment 1, Website design issues

Table:

Sr. no	URL	Purpose	Things liked	Things disliked	Overall
1	https://pict.acm.org	Represent the club, show its achievements/team/ past activities	1. Clean design 2. Maintained font 3. Looks very professional	1. Login & Signup page UI looks very basic, could have been more attractive. Seems like it is blanched. 2. In the domains section, more information could have been provided for specific domains.	The website looks very professional with clean UI. The transitions and quality of design is great!
2	https://www.pictcsi.com/	Represent the club, show its achievements/team/ past activities	1. Complete information about the club is given 2. Color code is maintained well 3. Animations are smooth and fits perfectly	1. Home page should have been more descriptive. It currently has only a photo and footer. 2. URLs aren't proper for example: for 'About us' page the URL could have been 'pictcsi.com/aboutus' instead of additional extension of '.html' 3. Navbar color coding could have been changed. The tab a user is currently on could have been brighter	Overall the website is very descriptive which helps a user get to know everything about the club. It keeps the user engaged. Apart from some minor changes the website looks good.
3	https://radiance21.in/	Publicize the event Radiance'21	1. Animations are great!! The animation on the home page is something I have never seen 2. The rest of the UI is keep clean and easy to use. For example: The big register button on the home page prompts the user to participate in the event	1. Font style looks very old and could have been more catchy 2. The cards on the events page looks a little unprofessional & the color combination with other factors like shadow effect could have been made better looking	The website is not that great, but serves the purpose without any issues. There's a scope to improve the UI
4	https://pict.edu/	Represent the institution	1. The website is very descriptive, it has all the necessary information a user would need 2. Proper navigation given	1. Color coding doesn't look good. The colors chosen doesn't look professional at all. Instead of strong colors, muted ones could have been used 2. The information on the website is not provided in a good readable format. If a person has to search for something, it could be little intimidating	Overall, there's a lot of scope for improvement on the UX side . There's a need for a clean UI with less intimidating UX
5	https://pict-o-real.in/	Represent the club Pictoreal	1. Animations are amazing, the screen loader, transitions after hovering/clicking a button are great!	1. The website looks very basic and there's a need to make it look more professional 2. The font format can be changed 3. The gallery section page can have a little better UI with large and rounded corner cards 4. Other unnecessary information like details about other clubs in college can be cut out	The website looks very basic and can be improved with little design additions.
